

### III. REMARKS

This Amendment and Response is being submitted in response to the non-final Office Action mailed on March 21, 2005. In this Office Action, claims 1-21 of the above-referenced application are pending and claims 1-10 and 21 stand as rejected by the Patent Office. Claims 11-20 have been withdrawn from consideration. In response to the present Office Action, claims 1-10 and 21 have been cancelled and new claims 22-40 have been added. The new claims are consistent with the application as originally filed and no new matter has been added. Cancellation of claim 1-10 and 21 makes any further discussion of the Patent Office's rejection (see pages 3-9 of the Office Action) of these claims under 35 U.S.C. §§ 102(b) and 103(a) unnecessary; however, the Applicant wishes to point out that the new claim elements of a "at least one light-admitting surface" and " at least one light-reflecting surface, wherein the angle of the at least one light-reflecting surface is adjustable relative to the at least one light-admitting surface" are not disclosed in, nor suggested by, the references cited by the Patent Office in the present Office Action. For at least these reasons, the Applicant believes that new claims 22-40 define patentably over the prior art and respectfully requests consideration of these claims.

Respectfully submitted,

Date: September 21, 2005

---
